NEW DUST MANIFOLD KIT FOR IMPROVED DUST COLLECTION

August 2006

Recently Midwest Automation introduced a new dust manifold as an accessory on our current model Cutting Stations to improve dust collection. Now available as a retrofit kit on existing models 5033, and CS 5230/5236. The system includes a single point exhaust line hookup with a pivoting connection that is easy to clean and eliminates multiple dust collection hoses and messy floors. Requires one 8-inch diameter outlet and a 1500 CFM dust collector.

For more information or to request a quotation, please contact your Midwest Parts & Service team toll-free at 1-800-697-1444 or via email at service@midwestgroupone.com.
